

Why Jamf for Apple Device Management and Security in Education

Deploy Apple devices to meet your exact purpose

Jamf's education solutions are designed to manage, secure and extend the functionality of Apple devices, fit for each user's purpose.

From streamlining and automating deployment, to ensuring network and user safety wherever connections are made, IT has one central, total solution capable of being tailored for staff, students, or open-access usage across the entire Apple ecosystem.

“ *Jamf allows us, in a moment's notice, to provide our teachers and students with whatever they need, when they need it.* **”**

Brian Messinger,
District Coordinator of Classroom
Instructional Technology
and Student Achievement,
Sewanhaka Central High School District

Success starts with purposeful management and security

Enroll

Enrolling a device enables management, control and visibility. It's the first workflow new admins configure and it is the first end user experience whenever a new device is unboxed.

- Automated Enrollment
- Zero-Touch Deployment
- Settings & Configuration
- Jamf BYOD

Automate

Automate and scale ongoing management tasks for Mac, iPad, iPhone and Apple TV to create a foundation for Apple success while preserving the native Apple user experience.

- Inventory Management
- Smart Groups
- Remote commands
- Application Management
- OS Updates

Secure

Take the right steps to make consumer devices suitable for learning. This includes meeting all of the various compliance requirements unique to each institution.

- App reporting
- SIEM / SOAR Integrations
- Web Content Filtering

Prevent

Actively defend against all manners of threats that impact the devices and users in your environment, including malware, on-device exploits and web threats like phishing, cryptojacking and ransomware.

- Endpoint Protection
- Web Threat Prevention
- Machine learning and threat intelligence (MI:RIAM)

Access

Ensure roster data is always in sync to grant the proper access to classes and resources, and connect users to the right apps and resources based upon their identity, role and location.

- Classroom management
- Self Service, Jamf Teacher, Jamf Student apps
- App request

Identify

Trusted users are a central tenant of modern deployment strategy. Grant users access based on their specific role, group membership or location. Map each user's cloud identity across all education workflows to achieve consistent policy and a streamlined user experience.

- Identity & Access Management (Jamf Connect for EDU)
- Local Account Management
